Preparing For and Living In a Brave New World

LaSalle/GTP Autism Conference
May 3, 2013

Eric R. Mitchell, Ph.D.
ericmpsyc@yahoo.com

Carol Moog, Ph.D.
focusmoog@aol.com
Today’s Agenda

Workshop Description:
- Today's generation of autistic people at the precipice of transitioning into adulthood face great opportunity as well as great struggles ahead of them. This workshop will present grassroots personal and professional efforts to develop responsive educational/social programs that lead to quality transitions to college, work opportunities, entrepreneurship possibilities, and daily living/relationship success.

Objectives:
- Participants will understand the ingredients needed for innovative, cutting edge training and education that prepares for the transition to adulthood.
- Mobilize grassroots efforts to utilize the strengths of the ASD community and other stakeholders.
- Participants will understand how to develop financially sustainable models for business development and employment centered on the strengths of autistic people.
- Participants will learn about the services and supports available for successful transitions to higher education, work opportunities, adult living, and beyond.
- Participants will understand the needs and strengths that can be tracked for success beginning in early childhood through the lifespan of autistic people.
Iceberg Model
REPRESENTING...
They say it all started
when Gerald was two—
That's the age kids start talking—
least, most of them do.
Well, when he started talking,
you know what he said?

He didn't talk words—
he went **BOING BOING!** instead!
“What's that?” cried his father,
his face turning gray,
“That's a very odd thing
for a young boy to say!”
“Amelia Bedelia,
why are all the light bulbs outside?”
asked Mr. Rogers.

“The list just said
to put the lights out,”
said Amelia Bedelia.
“It didn’t say to bring them back in.
Oh, I do hope
they didn’t get aired too long.”
NTs and Aspies/Auties

What Is NT?
Neurotypical syndrome is a neurobiological disorder characterized by preoccupation with social concerns, delusions of superiority, and obsession with conformity. Neurotypical individuals often assume that their experience of the world is either the only one, or the only correct one. NTs find it difficult to be alone. NTs are often intolerant of seemingly minor differences in others. When in groups NTs are socially and behaviorally rigid, and frequently insist upon the performance of dysfunctional, destructive, and even impossible rituals as a way of maintaining group identity. NTs find it difficult to communicate directly, and have a much higher incidence of lying as compared to persons on the autistic spectrum. NT is believed to be genetic in origin. Autopsies have shown the brain of the neurotypical is typically smaller than that of an autistic individual and may have overdeveloped areas related to social behavior.

* The Diagnostic and Statistical Manual of Normal Disorders: 666.00 Neurotypic Disorder

How Common Is It?
Tragically, as many as 9625 out of every 10,000 individuals may be neurotypical.

Are There Any Treatments For NT?
There is no known cure for Neurotypical Syndrome.

Neurodiversity

Amanda Baggs
• Self-advocacy via internet
• Higher level of interaction with entire environment
• People may be seen as objects, but not necessarily less important as entire environment becomes important
• Blogging and social networking
• Second-life

Carly Fleischmann
• “Technology has allowed me to communicate, learn social skills, implement relaxing techniques and played a crucial part in helping me how to spell. To me, technology is the key to unlocking autism.”
• Facebook, Twitter and blogging
Autistics to Autistics

Here are some tips from 15 y/o Haley Moss, autistic:

1. **Seek help if you don't understand something:** People with autism spectrum disorders are often detail-oriented and miss the bigger picture, Haley said. Her mother would read English books with her and discuss the themes to help Haley see them more clearly. Haley recommends consulting parents, siblings, teachers and textbooks if you are stuck on something.

2. **Learn about trends to talk about them:** Haley’s approach to popular culture is methodical and detached: learn about the trends to fit in, even if you don't like them. She saw all the "Twilight" movies on opening night even though she doesn't like the franchise much. She can recognize a popular Jonas Brothers song. Being up on the fads helps with socializing and avoiding ridicule, she said.” In middle school, everyone just cares that you're like them, and if you're different, you get picked on," Haley said. "No one accepts different people.”

3. **Trust your parents:** People with autism spectrum disorders tend to assume that everyone is trustworthy, and that can make them be easily manipulated, Haley writes. She recommends having a good relationship with your parents and entrusting them with your secrets instead of someone at school. Her parents help her with academic and social problems. Also, she looks to her mother to interpret classmates' comments that she didn't understand, instead of jumping to conclusions.

two green fish
My name is Matt and I have Asperger’s syndrome. What’s that mean, you ask? Well, you’re in luck, cause I’ve made this helpful guide!

Asperger’s is part of the autism spectrum. It has many characteristics, but generally we have difficulty knowing what someone is thinking, explaining our thoughts verbally, and interacting socially with our peers. It is sometimes described as having “a dash of autism.”
I am not a "person with autism." I am an autistic person. Why does this distinction matter to me?

1) Saying "person with autism" suggests that the autism can be separated from the person. But this is not the case. I can be separated from things that are not part of me, and I am still be the same person. I am usually a "person with a purple shirt," but I could also be a "person with a blue shirt" one day, and a "person with a yellow shirt" the next day, and I would still be the same person, because my clothing is not part of me. But autism is part of me. Autism is hard-wired into the ways my brain works. I am autistic because I cannot be separated from how my brain works.

2) Saying "person with autism" suggests that even if autism is part of the person, it isn't a very important part. Characteristics that are recognized as central to a person's identity are appropriately stated as adjectives, and may even be used as nouns to describe people: We talk about "male" and "female" people, and even about "men" and "women" and "boys" and "girls," not about "people with maleness" and "people with femaleness." We describe people's cultural and religious identifications in terms such as "Russian" or "Catholic," not as "person with Russianness" or "person with Catholicism." We describe important aspects of people's social roles in terms such as "parent" or "worker," not as "person with offspring" or "person who has a job." We describe important aspects of people's personalities in terms such as "generous" or "outgoing," not as "person with generosity" or "person with extroversion." Yet autism goes deeper than culture and learned belief systems. It affects how we relate to others and how we find places in society. It even affects how we relate to our own bodies. If I did not have an autistic brain, the person that I am would not exist. I am autistic because autism is an essential feature of me as a person.

3) Saying "person with autism" suggests that autism is something bad--so bad that it isn't even consistent with being a person. Nobody objects to using adjectives to refer to characteristics of a person that are considered positive or neutral. We talk about left-handed people, not "people with left-handedness," and about athletic or musical people, not about "people with athleticism" or "people with musicality." We might call someone a "blue-eyed person" or a "person with blue eyes," and nobody objects to either descriptor. It is only when someone has decided that the characteristic being referred to is negative that suddenly people want to separate it from the person. I know that autism is not a terrible thing, and that it does not make me any less a person. If other people have trouble remembering that autism doesn't make me any less a person, then that's their problem, not mine. Let them find a way to remind themselves that I'm a person, without trying to define an essential feature of my personhood as something bad. I am autistic because I accept and value myself the way I am.
ASD in the Theatre

Autism, The Musical

Love and Communication, by James J. Christy: marriage is slipping away and now the one thing that has united them - finding help for their son with autism - is driving them apart.

Lucy, by Damien Atkins
HELPING TO REPRESENT
Evolving Neurotypicals?

Max is back on the team:

Parenthood, Over-reacting?

Penny’s intro to Sheldon:

Penny gets it:
Advocating for Autistic People

Joining with family members, and supporting family members and self-advocates who advocate for needs within the family among those who are less savvy with autism.

Example: email to family members from sister of adult brother diagnosed with Asperger’s (other family members would not support services, rejected diagnosis, and advocated for a “pull yourself up by your bootstraps” or “tough love” approach):

<table>
<thead>
<tr>
<th>Perception</th>
<th>Reality:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stupid</td>
<td>He has an above average intelligence.</td>
</tr>
<tr>
<td>Lazy</td>
<td>He works hard at things he loves and get paralyzed by anxiety and stupefied by things that bore him.</td>
</tr>
<tr>
<td>Rude</td>
<td>He is having a righteous reaction to the fact that we are all abusive, inconsistent ***holes that bounce him around like a ball. None of us have good coping techniques to manage our own anger and pain. He is reflecting the behavior we model.</td>
</tr>
<tr>
<td>Immature</td>
<td>He is child-like and vulnerable because he is trusting.</td>
</tr>
<tr>
<td>Unmotivated</td>
<td>He is HIGHLY motivated--all he thinks about are his goals--he just doesn’t know how to achieve them.</td>
</tr>
<tr>
<td>Forgetful</td>
<td>Sensory integration issues make it hard to focus on multiple data points. And difficulty with planning and long-term thinking make it hard for him to anticipate future needs, like needing a house key.</td>
</tr>

Sports and Disabilities

- January, 2013: US Department of Education indicates that similarly with Title IX (gender equality), all students with disabilities must be provided with opportunities for extracurricular athletics, and that additional athletic programs must be created if existing programs don’t meet the needs of students with disabilities, including clubs.

- According to a 2010 report from the Government Accountability Office, disabled students do not have equal opportunities to sports, a right that is protected by the Disabilities Act of 1973

- Education Secretary Arne Duncan: Sports provide: “invaluable lessons in discipline, selflessness, passion and courage, and this guidance will help schools ensure that students with disabilities have an equal opportunity to benefit from the life lessons they can learn on the playing field or on the court”
When Do I Tell My Kid About ASD?

- Identity formation
- As soon as they’re ready
- The earlier the better
- Positive aspects, with difficulties like others
- Before depression and/or behavioral difficulties
- They may let you know
- Connecting with others
When Do I Tell My Kid About ASD?

Critical mass

“coming out” to others

Finding safe havens
TOOLS FOR WORKING WITH SOCIAL ANXIETY
Comic Strips & Smartboard
The Power of Video

- Social skills
- Favorite movies and parsing out emotions, intent, interaction, etc.
- Self-awareness, vocals, non-verbals
- De-escalation
- Posting on internet
- Team collaboration
Conversation Training

- Introduction w/reason for approach
- “Safe” compliment
- Repeat x 3:
  - Question @ what they might like
  - Wait for response
  - Self-disclosure
- Wait for lack of response
- See-you-later w/reason for ending

- Additional interventions:
  - Videotape
  - Mentoring
  - Real-life Confederates
  - Eye contact, nod, and facial recognition/memory
Social Skills Toolbox

- **Key Components**
  - Managing eye contact
  - Understanding social cues
  - Working with personal space in this culture
  - Reading non-verbal information
  - Taking in another’s perspective
  - Sharing the stage (Reciprocity)

- **Most are aware of poor social skills and want to have relationships**
The Gift of Time and Space

Simply offering time away from the situation (instead of critique or discussion) gives space for recovery, as depicted by this poem written after a student was able to take time away following a social meltdown:

My Sorrow

The crosswind blew, and the ship crashed.
The passengers became unsteady, and not all of them made it.
I was on a boat alone.
On a life boat.
I got home, apologized for my reckless driving, and returned to my conscience.
SUPPORTING TRANSITIONS THROUGH SOCIAL SKILL DEVELOPMENT
Preparing for Changes in Routine

Parenthood, Coaster, change in routine:

Parenthood, Halloween:

Parenthood, camping with Grandpa:

Parenthood, sleepover:
Improving Conversation Skills

- Conversation “dance”
  - Topic Transitions
  - Implementing Conversations Skills

**Scene Starters**
- Strangers at Starbucks
- Seat Partners
- Dorm Doldrums
- Destination Dilemma
- Orientation Day

**Notice in self and in others:**
- Eye Contact
- Body Posture
- Voice
- Mood/Emotion
- Conversation Closing
CONVERSATION RECIPROCITY

- Keep balloon in the air activity (fun/needs all)
- Yes But vs Yes And…: Pairs
The Friendship Algorithm

Should I laugh?

Place Phone Call

HOME

YES

"Would You Like To Share A Meal?"

NO

Leave Message

What is the Response?

NO

Wait For Call Back

YES

Dine Together?

"Do you Enjoy a hot Beverage?"

YES

Recreational Activity? Tell me one of your Interests?

NO

COUNT

COUNT < 5?

YES

NO

Do I share That interest?

"Why don't We do that Together?"

CASE: TEA COFFEE COCOA

HAVE TEA HAVE COFFEE HAVE COCOA

Partake in interest

Least Objectionable Activity

Begin Friendship
Social Skills

- Scripting
- Rehearsal
- Mentorship
- Shadowing

Social Rejection

Incentives for social skills:

Payoff for social skills:
BUILDING RESILIENCE FOR HANDLING CRITICISM
Counter-Criticism Exercise

- Think of your best trait
- Think of your worst trait
- Use traits to introduce self at “cocktail party”
- Experience?
Creating Realistic Self-Perceptions: Personal Brand Identity

- Self-Assessment Form
  - Questions became catalyst for trusting curiosity, honest feedback, and group support (what do you value/how do you see yourself/think others see you)

- Personal Slogan
  - If you think of yourself as a brand what would your slogan be, one that characterizes you (share?)
    - Examples
      - “Know everything”
      - “Never quit”
      - “Whatever you are, be a good one”
      - “No regrets”

- 30 second commercial
  Develop a brief personal statement (aka 30 second commercial)
  - Why?
    - Prepared answer to dreaded interview question: “Tell me about yourself”
Criticism as “Offer” to Accept

- Saying “yes” and noticing/enabling offerings (Yes, and…)
- “Criticism” as observation
- Difference between criticism and observation
- Tone
- Theory of mind
Theatre Activities

- Task analysis
- Music (ie, brushing teeth)
- Movement (ie, triangle puzzle... first have leader conduct nonverbally, then only verbal, then tell group to come up with a shape and make it)
- Roleplay (ie, blowing your nose)
- Empathy, turn-taking, social skills, FUN!!!
FRAMING DIFFERENCE THROUGH DIVERSITY AND STRENGTH, NOT DIAGNOSIS
ASD and Culture

Mitchell’s Cyclical/Contextual Model of Cultural Competence

• Is ASD a:
  A. Disorder?
  B. Syndrome?
  C. Condition?
  D. Deficiency?
  E. Difference?

• Rac-ism
• Sex-ism
• Aut-ism?
ASD Culture

- What is culture?
  - Language
  - Food
  - Common interests
  - Routines, etc.
- Critical mass
- Making connections
- Aspies
- Tech and computers
  - Podcasts
  - Websites
  - Discussion groups
  - Autreat, ASAN, etc.
- Between-group vs. within-group differences

Roy Richard Grinker: Unstrange Minds:
Scott & Ari: Autreat:
ASD at Community College of Philadelphia rose from 3 to 25 from 2007-2011

"Colleges are seeing more people with autism spectrum disorders, the kinds of people who, in the past, wouldn't have gone on to college," says Felicia Hurewitz, director of the Autism Support Program at Drexel University. "We have a lot of diversity. Neurodiversity is the newest."

Accommodations: copies of lecture notes, extended time, quiet testing area, tech supports, peer mentoring, single rooms, group supports, open mics, academic/organization support

Social Skills: Ryuu

Rebecca Klaw and Joel Shaul

The Ryuu Card Role-Playing Game

There are two versions of the Ryuu Card Role-Playing Game – Beginning and Advanced. Even the beginning level, however, is complex in what it requires of the players and what it requires of the adult. This game is for players who have become familiar with the strengths and challenges of each dragon character, who have mastered the concepts of the Forces and who can now begin to use all of the information about Ryuu in improvised play-acting. The game is also for an adult who feels comfortable guiding players through the imagined scenarios, helping them plan what will happen, giving them support and guidance while in character, and generally being a model and a coach simultaneously. [For more tips on guiding role-plays, see the Tip Sheet for Leaders.]

Elwyn Industries
Aston, PA

2012: Defense Logistics Agency contracts with Elwyn Industries: $7.7 million for making bandages

Elwyn: nonprofit serves people with special needs

adult day services

Elwyn Industries already:
- makes medals for armed forces
- does maintenance on federal buildings
UCP Chestnut Hill programming:

- OVR evaluation, Interest inventories, cognitive assessment
- Contract shop assessment for general work habits
- In-house training for areas of interest, food services, child care, janitorial
- OT assessment, Work adjustment training
- Funding for 14 weeks through OVR
- Post employment services
- Strength-based jobs and the match for disabilities, as opposed to drug addictions and other challenges of neurotypicals
- CLA’s and MR waiver funding
Placements & Resources

- **Traditional:**
  - Community Residential Rehabilitation (CRR)
  - Community Living Arrangement (CLA)
  - Outpatient services
  - Residential settings
  - Individual aide

- **Next Steps:**
  - Build-your-own Silicon Valley
  - Maximize strengths
  - Finding functional fixations
  - What CAN the individual do?
  - What CAN the group do?
New Programs for Working and ASD

- www.worksforme-pa.org
  - I am Daniel and I am looking forward to a career in finance or communications. I refuse to let being born with Autism stop me from going after my dreams. I serve my community by motivating others with disabilities to go after their dreams too! I take pride in being a gentleman and a minister at my church. I enjoy traveling, baseball games, and the internet. I did work study in high school and got paid. My college classes and my trans passes do not cost us anything. And none of this hurt my social security check or stopped me from getting medical help. Some things are hard for me, but I have people from the Work Incentive Planning and Assistance program who believe in me and are helping me. I look forward to using the Ticket to Work program to continue my career path and show everybody my abilities!

- JEVs: new program specifically supporting ASD…No job carving…yet.

- Villanova Entrepreneur’s Network proposal
Job coaching Vs. Job carving

- Fitting a square peg into a round hole
- Underestimating abilities of those on the spectrum
- Splinter skills
- Strengths-based assessment and placement
- Filling a hole vs. finding a need
- Finding partner employers… often limited to corporations with executives who have family members on the spectrum
- Issues of possible exploitation
The Specialists

- Specialisterne: Software Testing in Denmark
  - 60 consultants are considered best-in-class
  - paid industry-competitive wages
  - customers include LEGO, Microsoft, and Oracle
  - 75 percent have Asperger syndrome or some form of ASD
  - consultants enjoy their work and are great at it
  - Testing process—checking and rechecking outcomes, documenting test plans, and maintaining follow-through
  - making use of high intelligence, precision-oriented skills, deep concentration, and patience that can be positive features sometimes accompanying ASD
  - "This is not cheap labor, and it's not occupational therapy… We simply do a better job.”
  - Model is taking off with public and private funding
ALAW:
Roy Diamond & Becky Willmot

- 2 Phoenixville homes in 2000, 1 Media, 1 NE Philly
- Waiver Funding, LLC, PHFA Grant, Vouchers
- $500 Food Budget with $100 extra
